---

Severe food allergies can be life-threatening. While more than 160 foods can cause allergic reactions in people with food allergies, the law identifies the eight most common allergenic foods as “major food allergens”. They are Milk, Eggs, Fish, Crustacean shellfish, Tree nuts, Peanuts, Wheat, and Soybeans.

EMSL has a laboratory near you that specializes in allergen testing which gives you the knowledge to label your product correctly.

For over 30 years EMSL has led the industry in testing and analysis. Our professional staff of trained scientists, technicians and analysts can also provide Method Validation & Development.

Submit 1 oz sample per analyte requested\*

## Food Allergen Analysis

Almond Allergen  
Brazil Nut Allergen  
Casein Allergen  
Cashew Allergen  
Crustacea Allergen  
Egg Allergen  
Food Allergen - Specialty  
Gliadin (Gluten) Allergen  
Hazelnut Allergen  
Lupine Allergen  
Macadamia Allergen  
Mustard Allergen  
Peanut Allergen  
Pistachio Allergen  
Sesame Allergen  
Shellfish Allergen  
Soy Allergen  
Soy Flour Allergen  
Total Milk Allergen  
Walnut Allergen

## Environmental Allergens

Cat  
Cockroach  
Dog  
Dust Mites  
Fungal  
Latex  
Mouse and/or Rat Allergens

Food Allergen Testing is performed when there is a need to confirm or deny the presence of a specific regulated food allergen.

EMSL offers analysis for detection of the most common food allergens of concern.

Additional food allergens testing is available upon request.

Methods offered include: FDA/BAM, USDA, USP, AOAC, CMMEF
